

Careers

Technical Project Manager/Coordinator, Belfast

Join our expanding team of innovators and technical professionals in delivering solutions that have an impact on our vision to clean and decarbonise the air.

Technical program management and oversight is required to deliver our industry leading technology projects.

Position Responsibilities

- Working across a broad range of technical areas.
- Program management of technical projects to ensure all key milestones are achieved.
- Develop a co-ordinated approach across a diverse technical team.
- Accurate budget and control of costs.
- Periodic detailed reporting and stakeholder meetings.
- Oversight of prototype source and manufacture.
- Project engineering and management from concept to realisation.
- Leading engineering design, design for manufacture and design for cost reviews.
- Capturing, recording, and improving KPI's.
- Quality, health and safety leadership.

Essential Requirements

- Degree-level education in engineering, science or technical discipline.
- Experience in fast paced, multi-discipline R&D projects preferred.
- Works well in small cohesive team and independently as required.
- Good communication with ability to present to stakeholders at all levels.
- Ability to effectively manage risk and adapt to changing plans.

Benefits:

- Competitive basic salary commensurate with experience.
- Benefits package including – Company Pension, Private Medical, Cycle to Work Scheme etc.

About CATAGEN

CATAGEN is a pioneering testing facility delivering industry leading emissions data to global OEMs and stakeholders. Based in Belfast, our independent services provide unrivalled metrics to optimise catalyst development and reduce harmful tailpipe emissions.

Using technology, talent, and a united sense of purpose, CATAGEN have developed ClimaHtech. ClimaHtech is an acceleration system towards decarbonisation using advanced climate technologies to produce renewable hydrogen and E-Fuels.

Our testing and climate technologies are shaping the environment of our future by working towards cleaner air for our cities.

Values

ONE CATAGEN - We put 'we' before 'me' working across boundaries, holding each other accountable and working as a cohesive team.

FEARLESS - We challenge ourselves to push beyond what we think is possible by taking risks and learning new skills.

CUSTOMER OBSESSED - We actively engage, listen and learn from our customers, making it easy to work with us. We deliver solutions in a timely and accurate manner.

ECONOMICALLY DRIVEN - We're ambitious in our 'financial goals' whilst being prudent with resources. We respect that we are a corporate business whose first goal is to be financially secure and to grow and identify new opportunities.

SUSTAINABILITY - We built CATAGEN 'to clean and decarbonise the air', to impact climate change through the development of innovative Net Zero Technologies.
